About Me

Systems Engineer and Senior Software Engineer with a full-stack focus, specializing in software design, systems architecture, and data analysis. Experience leading technical decisions and designing scalable, resilient, and maintainable solutions, applying Domain-Driven Design (DDD), Hexagonal Architecture, and SOLID principles. Focused on separating responsibilities, managing domain complexity, and building high-quality software through Clean Code, engineering best practices, and collaborative technical leadership.

Education

Universidad de la costa Feb 2019 - Sep 2024

Bachelor of Software Engineering *Barranquilla, Colombia*

- **Relevant Coursework:** Data Structures and Algorithms (Java), Object-Oriented Programming (Java), Web Development (JavaScript), Python Programming, Operating Systems, Software Engineering, Software Architecture, Design Patterns, Database Systems, Computer Networks, Distributed Systems, Cloud Computing

Experience

Grupo NEX May 2025 – Present

Senior Software Engineer *Medellín, Colombia*

- Architect and develop scalable backend microservices using NestJS, TypeScript, DDD, Hexagonal Architecture, and CQRS, improving domain modularity and system maintainability.
- Engineered AWS cloud infrastructure using ECS, S3, SNS, and Cognito, ensuring high availability, robust security, and seamless service-to-service communication.
- Streamlined asynchronous processing with Redis and BullMQ, decoupling background workloads and reducing task processing latency by 40%.
- Optimized GraphQL APIs and PostgreSQL query strategies, resolving N+1 performance bottlenecks and boosting data retrieval response times by 60%.
- Deliver fullstack features using Next.js and TypeScript, integrating modern frontend architecture with high-performance backend APIs.

Tecnoglass S.A.S. Feb 2023 – May 2025

Software Engineer *Barranquilla, Colombia*

- Developed enterprise backend microservices using Node.js and Python, automating critical industrial workflows and optimizing operational efficiency.
- Designed and deployed RESTful APIs using Django, Flask, and FastAPI, translating complex business logic into high-throughput microservices.
- Modeled and tuned persistence layers across PostgreSQL and MongoDB, improving data consistency, query execution, and database scalability.
- Collaborated with cross-functional stakeholders to troubleshoot production incidents, resolve bottlenecks, and enhance core system stability.

Ingeniería de Bioservicios S.A.S. Aug 2021 – Feb 2023

Software Developer *Barranquilla, Colombia*

- Engineered and maintained fullstack web applications using React, Node.js, and TypeScript, delivering core product enhancements and bug fixes.
- Managed application deployments across hybrid on-premises and cloud environments, ensuring 99.9% system uptime and seamless release delivery.

Freelance Jun 2020 – Aug 2021

Software Developer *Barranquilla, Colombia*

- Architected, developed, and launched custom web applications for multiple clients, delivering end-to-end software solutions tailored to user requirements.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java.
Backend Technologies: NestJS, Express, Node.js, Django, Django DRF, Flask, FastAPI.
Frontend Technologies: Next.js, React, Angular, Vue.js, Tailwind CSS, Bootstrap.
Databases & ORMs: PostgreSQL, MySQL, MongoDB, Redis, Prisma, Sequelize, Mongoose, SQLAlchemy, Django ORM.
Architecture & Design: Domain-Driven Design (DDD), Hexagonal Architecture, CQRS, Event-Driven Architecture, Microservices, Event Sourcing, SOLID Principles, Clean Code, Design Patterns, System Design.
Cloud, DevOps & Infrastructure: AWS, Azure, Docker, Kubernetes, Infrastructure as Code (IaC), CI/CD, Observability, Distributed Systems, Asynchronous Processing (BullMQ, RabbitMQ).
APIs, Testing & Engineering: RESTful APIs, GraphQL, Authentication & Authorization, TDD, Unit/Integration Testing, Performance Optimization, Scalability.
